

MeaWallet™

Mea Token Platform – I-TSP

The Mea Token Platform I-TSP opens the door to the world of digital payments. It facilitates tokenization as a secure way to store and process card data and connect to digital wallets. The Mea Token Platform also keeps up with current regulations and requirements so you don't have to.

Key Benefits

Enable digital payments

One universal gateway to TSPs and digital wallets

Speed up integration and time to market

Why Mea Digital Cards?

Mea Card Data allows the user to see all the card details through an app to use for e.g., online shopping.

Perfect for program managers without PCI-DSS certification.

Multi-scheme and multi-wallet support via a single connection

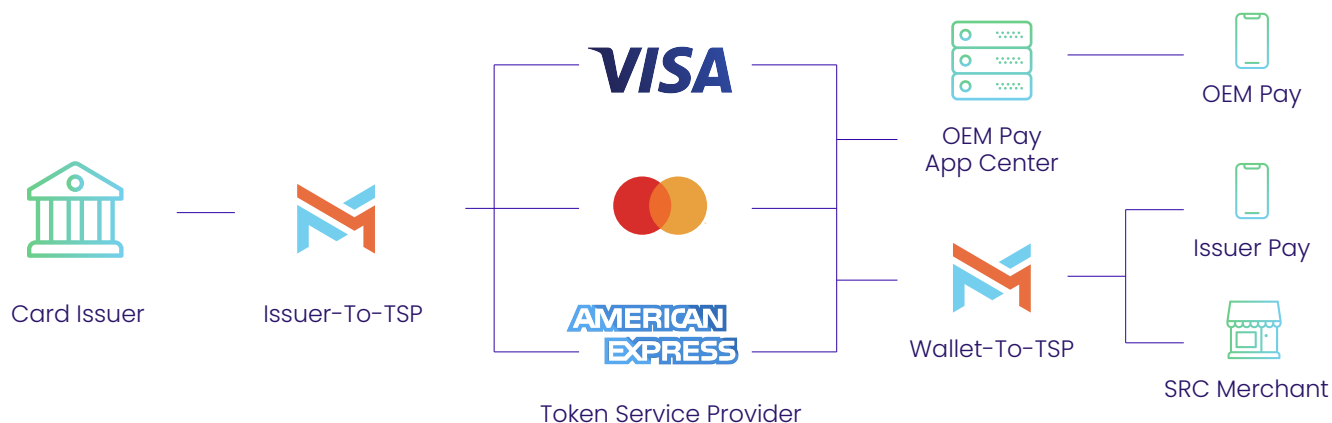

Simplifies and speeds up tokenization

Automatically updated to be compatible with current TSP services and compliant with the latest safety and security standards

Supports all major payment schemes through one integration, allowing merchant tokenization, EMV Secure Remote Commerce (SRC), Issuer Pay, and OEM Pay

Supported Schemes

VISA

**AMERICAN
EXPRESS**
