Key Benefits

Access all
OEM wallets

Supports all major
payment schemes
through a single
connection

Secure, compliant,
and certified

Why Mea Token Platform for OEM Pay?

The use of OEM Pays has grown significantly, and its presence continues to expand into new markets.

The Mea Token Platform

Provides a step-by-step approach to enabling OEM Pay, meaning issuers can start with a single wallet and add new ones as and when they desire.

Removes the burden of maintaining solution certification and compliance, managing the necessary changes to ensure products are kept updated.

Meets the increasing consumer demand for simpler, more manageable payments, both in-store and online.

Acts as an abstraction between issuers and TSPs.
